

To whom it may concern:

I engaged the services of Cantex for a supply and install floor sealing contract requiring repair and sealing for a new 650,000 sqft distribution facility for Cadbury Trebor Allan in Stoney Creek, Ontario.

The project had extremely tight timeframes and required the co-ordination of other contractors performing fire protection, racking, lighting and air conditioning also working within the 650,000sqft facility.

Cantex had a history of installations in the area and gave their assurance timeframes could be met. The contract was awarded to Cantex for this important project.

Cantex was proactive in communicating their concerns and progress throughout the project making certain I was informed at each milestone of the installation.

Cantex proved their ability to supply and install a high quality product in a very demanding environment. The company was professional, competitive in their bid and expedient in their delivery to my utmost satisfaction.

I can fully recommend, without any hesitation, Cantex for future projects of this nature.
